

Guard Against Slips and Water Damage From Leaks and Excess Condensation

Flat socks are super absorbent strips that only expand when in contact with water (or water-based fluids). Each strip makes an excellent barrier protecting walkways and nearby equipment.

- Extremely low profile allows the flat sock to reach those tight spaces that traditional socks cannot
- Color-coded yellow for safety to reduce the risk of slips and falls
- Greater contact area with the floor
- Simply tear each strip off at the perforation
- Flat socks won't drip even when saturated
- Each strip will absorb up to 3 litres of water per strip for a total of 75 litres per roll

Flat Sock: Low Profile Water Barrier

Item#	Description	Size	Pack Qty
UFS-120-25	Yellow Universal Flat Sock	120 x 12.5cm	25/Roll

Ideal for a Number of Applications:

- Refrigeration Areas
- Grocery Stores
- Floor Care/Cleaning
- HVAC
- Restaurants (Behind the Bar)
- Anywhere excess aqueous fluids are a concern

Sorbents play a critical role in building safety, cleanliness and compliance. Flat Socks can help you prevent slips, trips and falls; meet regulatory guidelines; and be prepared when that spill does happen.
